

■ Playback with 'Command and Control' of your iPod

The Denon ASD-1R lets you connect your iPod to a Denon component with a dock control or to a Denon mini component equipped with a system connector. This connection allows you to control your iPod with your Denon remote controller that came with the Denon component.

■ Display iPod information on your TV or other monitor

You can monitor iPod text information, such as menus and track names, on a TV screen, or a front panel display of Denon's component. (This feature is only available when connected to Denon products with a dock control.)

■ Recharge your iPod

■ Enjoy photos and videos, too.

The ASD-1R lets you show slide shows or videos stored in your iPod (only iPods with slide show or video playback capability).

■ Supported iPods

The ASD-1R supports iPods equipped with the Dock Connector Port. However, 3rd-generation iPod (with Dock Connector) require Apple iPod Universal Dock Adapter (separately available from Apple Computer, Inc.) in order to be connected to the ASD-1R.

Please visit <http://blog.denon.com/asd-1r/> for more details on compliant models and connection procedures.
