

ProHT Bluetooth Stereo Headset

Quick Setup Guide

How to pair Bluetooth Stereo Headset to Bluetooth device.

1. Turn the headset to pair mode. (hold the power key till LED change to Red and Blue light keep flash one after another one).
2. Turn the source unit (iPad, iPhone, Smartphone, etc.) to Bluetooth search mode, then search for new device (if have problem please check the source unit user manual).
3. After the unit finds "BH-ProHT" (headset model) . please pair the device. Some devices will need to be paired up by keying in the password "0000" .After the headset is pair, the function will be ok, you can use the headset earphone to listen stereo music or take or make phone calls through the microphone.
