OK    Cancel
6) Click Finish

Setup Complete

## Connecting the Camera to the PC

The camera can be connected two ways with the supplied USB cable.

1) When connecting directly from your Everio, open the cover located on the camera's front and connect the USB Cable to both the PC and Camera.

2) Put the camera on the included docking station (GZ-MG155, 255 & 555).  Connect the USB Cable to both the PC and Everio Docking Station.
*(USB input is located on the side of the Everio Docking Station)*

1) Connecting directly from camera

2) Connecting directly from Docking Station

3) Turn the camera on.

## File Backup on PC (DIRECT BACK UP)

1) Install the included software. *(see "share your memories to a computer" section in this user guide)*

2) Connect camera to PC using USB. *(see "connecting your computer to the PC" section in this user guide)*

3) Set the camera's power/mode switch to ON.

4) On the camera: Press (DIRECT BACK UP) and PowerCinema will start.

*Direct Back Up*

5) On the PC: File copy starts. When the progress bar disappears, the process is complete.
## File Backup  (PC and Mac) without using software

1) Connect camera to PC using the USB cable. *(see "connecting the camera to the PC")*

2) Set the camera's power/ mode switch to on
3) Create a folder to backup files into.

4) On the camera: Move the set lever up/down to select PLAYBACK ON PC, then  press down.

5) On the PC: Double click (EVERIO_HDD) or (EVERIO_SD).

6) Select the folder that you want to backup. Drag & drop it into the folder you created in step 3.

*SD_VIDEO: This folder contains all your video files. Open this folder and Drag & Drop the folder.  if you want to back up individual video files, Drag & Drop individually.  Example PRG001*
*DCIM: This folder contains still images. Open this folder and Drag & Drop the folder.  If you want to back up individual video files, Drag & Drop individually.  Example PIC_0001.JPG*
