## English

### Your life just got easier.

No need to plug multiple peripherals into your notebook every time you return to your desk. Through one simple USB connection, the Kensington sd100 Notebook Docking Station instantly to your USB, mouse, keyboard, printer and other peripherals. As an added benefit, placing your notebook on top of the Docking Station allows for better cooling and protection.

### System Requirements

- PC with the following specifications:
  - Windows Vista or Windows XP with Service Pack 1 or higher
  - 30KB of available disk space
  - CD-ROM or DVD drive
  - USB 2.0 port

Note: The sd100 Notebook Docking Station will work if connected to a USB 1.1 port on your notebook; however, the performance of devices connected to the Docking Station via a USB 1.1 connection could be compromised.

### Installation Instructions

**IMPORTANT:** The devices connected to the Docking Station work only after the installation process is completed. You must complete the installation instructions before using any device connected to the Docking Station.

#### Connecting the Docking Station to Your Notebook

1. Insert the CD (D) into your notebook's CD-ROM or DVD drive.
2. Plug the power adapter (C) into the jacks on the Docking Station. Then plug the power adapter into a working electrical outlet.

The red indicator light next to the adapter jack glows when the Docking Station is powered.

Note: Always keep the Docking Station connected to the power adapter supplied with the product. The performance of devices connected to the USB ports of the Docking Station may be limited without the power adapter connected.

3. Plug the square end of the USB cable (B) into the USB upstream connector at the back of your notebook. The connector is indicated by the symbol .
4. Start your notebook. It is not ready on.
5. Plug the other end of the USB cable (B) into an available USB 2.0 port on your notebook.

Note: The sd100 Notebook Docking Station will work if connected to a USB 1.1 port on your notebook; however, the performance of devices connected to the Docking Station via a USB 1.1 connection could be compromised.

### Installing the Software Drivers

Note: You must have Administrator privileges to install the Docking Station drivers. If you do not have Administrator privileges, log off from Windows and log in with a user name that has these privileges.

- Once you've connected the Docking Station to your notebook, Windows detects the Docking Station and begins the driver installation.
1. The found New Hardware Wizard should open.
2. If Windows asks for permission to connect to Windows Update, select **No, not this time**, and then click **Next**.
3. Select **Install the software automatically [recommended]**, and then follow the on screen instructions.
4. When the wizard has finished installing the software, click **Finish**.

Note: Be sure to check [www.kensington.com](http://www.kensington.com) for driver updates or enhancements.

### Using the Docking Station

You may connect to the appropriate port on the Docking Station while your notebook is running. A slight delay is normal before the notebook recognizes the new device.

#### USB 2.0 Ports

Connect any USB device to one of the Docking Station's five USB ports (F). Each port has a status indicator light that shows the status of that port:

- When no device is connected to the port, the indicator light is off.
- If a device is connected to the port and the connection works properly, the indicator light glows green (G).

Note: If a USB device is connected to the Docking Station and does not work as expected, test the device by connecting it directly to one of your notebook's available USB ports.

#### Ethernet Port

The Docking Station's Ethernet port is a USB 2.0-to-Fast-Ethernet Adapter. Connect a network cable (sold separately) to the Ethernet port (G) for high-performance network access.

- The light to the left of the port glows when there is a network connection.
- The light to the right of the port glows when there is network activity.

### Disconnecting the Docking Station

You can connect and disconnect the Docking Station while your notebook is running.

1. If the Docking Station is transferring data through one of its connections, wait until the data has finished transferring.
2. If you are connected using the Ethernet port (G), close your network connection.
3. On your notebook, click the **Safety Remove Hardware** icon in the system tray.
4. Select **Safely Remove USB 2.0 to Fast Ethernet Adapter**.
5. Disconnect the USB cable (B) from your notebook's USB port.

### Troubleshooting

If your Docking Station does not operate as expected, first check these items to try and correct the problem. If the problem persists, please contact Kensington Technical Support. Contact information is provided in "Technical Support," below.

#### General

The Docking Station does not appear to be "on."

1. Check to be sure that the power adapter (C) included with the Docking Station is plugged into the Docking Station and into a working electrical outlet. Do not use the adapter that came with your notebook or adapters other than the one supplied with the Docking Station.
2. Unplug the USB cable (B) from either the Docking Station or your notebook.
3. If the red light indicator on the back of the Docking Station is lit, the power is connected properly. If not, go to step 4.

4. Use the USB cable (B) to connect the Docking Station:
  - Unplug the power adapter (C) from the Docking Station.
  - Connect the USB cable to the Docking Station and to your notebook. Make sure that no other devices are connected to the Docking Station.
5. If the red light indicator is lit, the power adapter (C) does not work properly; be sure that the power adapter is plugged into a working electrical outlet. If the light is not lit, there may be a problem with the Docking Station.

*My notebook will not "connect" to the Docking Station.*

1. Insert the CD (D) into your notebook's CD-ROM or DVD drive.
2. Unplug and replug the USB cable (B) into both the Docking Station and your notebook. If Windows does not find new hardware, go to step 4.

3. Plug the USB cable (B) from the Docking Station into a different USB port on the notebook. If Windows does not find new hardware, go to step 4.

4. Test the operation of the Docking Station with these steps:

- Make sure that the power adapter (C) is connected to the Docking Station.
- Plug a USB device, such as a mouse, into one of the USB ports of the Docking Station. Rest the notebook.
- If Windows now finds new hardware, go to *Installing the Software Drivers*, above, and follow the steps to reinstall the software drivers. If installation is successful, the USB device plugged into the Docking Station should work properly. If Windows does not find new hardware, there may be a problem with the Docking Station.

#### Ethernet Connection

*My Ethernet connection is not working and I am using Windows XP.*

1. Be sure that the power adapter (C) is plugged into the Docking Station and into a working electrical outlet, that the correct drivers are installed, and that the network cable is connected to the Docking Station's Ethernet port (G).

2. On your notebook, open the Control Panel and select **Network Connections**. Follow the cursor over Local Area Connection icons. One icon will display a name containing **USB 2.0 Fast Ethernet Adapter**.

3. Double-click on this icon. If the Connection Status shows "Connected," the port is correctly configured and the Ethernet connection should work properly.
4. If the status does not show "Connected," test the cable by plugging it into the network port on your notebook. If the status still does not indicate a connection, the problem is with the cable or the network and is NOT related to the Docking Station. If the status shows "Connected," there may be a problem with the Docking Station.

#### Network Connection

*My network connection is not working and I am using Windows XP.*

In order to connect to some networks, you may have to know the NIC card address for the network card on the notebook. Follow these steps to locate the address:

1. Make sure the Docking Station is connected to your notebook using the cable (B).
2. On your notebook, open the Control Panel and select **Network Connections**. The following icons are displayed: Local Area Connection, Wireless Connection (if your notebook has wireless capabilities), and Local Area Connection (where a 1 is showing next to the number 1, 2, 3, 4, etc.).

The third icon corresponds to the network connection for the Docking Station.

3. Right-click on that icon and select **Properties**.
4. On the General tab, look for the adapter name containing **USB to Fast Ethernet Adapter**. Roll the cursor over the adapter name to display the NIC card address.

#### Audio

*I cannot adjust the volume from my notebook keyboard.*

If the volume control does not work using the volume control keys on your notebook, use the mouse to adjust volume using the controls from the notebook's system tray. You can also install the latest updates for your operating system to try and fix the problem, on a Windows XP notebook, we recommend Windows XP Service Pack 2.

*I cannot hear anything through my notebook speakers.*

Some notebooks default to the USB audio when the Docking Station is connected, disabling your notebook's built-in speakers. To enable the speakers:

1. Be sure that the power adapter (C) is plugged into the Docking Station and into a working electrical outlet.
2. Unplug and replug the USB cable into the same USB port. If this does not correct the problem, plug the device into a notebook USB port. If the device still does not work, there may be a problem with the device.

3. If the device works, plug the device into one of the Docking Station's USB ports (F) to verify that it works with each. For ports that do not appear to work, test again. If some ports do not work, there may be a problem with the Docking Station.

#### Federal Communications Commission Radio Frequency Interference Statement

Note: The Kensington sd100 Notebook Docking Station model no. 33419 has been tested and found to comply with the requirements for Class B digital devices pursuant to the Commission's part 15 rules for devices that radiate no more than a certain level of radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

**MODIFICATIONS:** Modifications not expressly approved by Kensington may void the user's authority to operate the device under FCC regulations and must not be made.

**SHIELDED CABLES:** In order to meet FCC requirements, all connectors to equipment using a Kensington input device should be made using only the shielded cable provided.

#### Declaration of Conformity Compliance Statement for the Kensington sd100 Notebook Docking Station

The Kensington sd100 Notebook Docking Station model no. 33419 complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. As defined in Section 2.1019 of the FCC, the responsible party for this device is Kensington Computer Products Group, 333 Twin Dolphin Drive, Redwood Shores, CA 94065, USA.

This Class B digital apparatus complies with Canadian ICES-003.

#### CE Declaration of Conformity

The Kensington sd100 Notebook Docking Station model no. 33419 has been tested in accordance with essential requirements for CE marking. Kensington hereby confirms this product complies with all the requirements set out in the Council Directive on the application of the law of the member states relating to the electromagnetic compatibility (89/336/EEC) and the amendments in the Council Directive 93/71/EEC and 93/68/EEC.

For Europe, a copy of the Declaration of Conformity for this product may be obtained by clicking on the Compliance Documentation link at [www.support.kensington.com](http://www.support.kensington.com).

#### Two-Year Limited Warranty

KENSINGTON COMPUTER PRODUCTS GROUP ("KENSINGTON") warrants this product against defects in material and workmanship under normal use and service for two years from the original date of purchase. KENSINGTON, at its option, shall repair or replace the defective unit covered by this warranty. Please retain the dated sales receipt as evidence of the date of purchase. You will need for any warranty service. In order to keep this warranty in effect, the product must have been handled and used as prescribed in the instructions accompanying this warranty. This warranty does not cover any damage due to accident, misuse, abuse or negligence. This warranty is valid only if the product is used with the equipment specified on the product box. Please check product box for details or call KENSINGTON technical support.

#### DISCLAIMER OF WARRANTY

EXCEPT FOR THE WARRANTY PROVIDED HEREIN, TO THE EXTENT PERMITTED BY LAW, KENSINGTON DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ALL WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE, TO THE EXTENT THAT ANY IMPLIED WARRANTY MAY NOTHEREIN BE OVERRULEN BY LAW. ANY SUCH WARRANTIES ARE LIMITED TO THE TWO-YEAR DURATION OF THIS WARRANTY.

SOME STATES/PROVINCES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATIONS MAY NOT APPLY TO YOU.

#### LIMITATION OF REMEDY

REPAIR OR REPLACEMENT OF THIS PRODUCT, AS PROVIDED HEREIN, IS YOUR EXCLUSIVE REMEDY. KENSINGTON SHALL NOT BE LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, LOSS OF USE OF SOFTWARE, LOSS OR RECOVERY OF DATA, ARISING OUT OF ANY REPAIR OR REPLACEMENT. ANY IMPLIED WARRANTY CONTRACT, STATUTE OR OTHER LAW, IN ANY JURISDICTION, IS HEREBY EXCEPTED FROM ANY WARRANTY IMPLIED BY LAW, OR IN THE EVENT THAT ANY IMPLIED WARRANTY FAILS OF ITS ESSENTIAL PURPOSE, IN NO EVENT WILL KENSINGTON'S ENTIRE LIABILITY EXCEED THE PURCHASE PRICE OF THIS PRODUCT. SOME STATES/PROVINCES DO NOT ALLOW THE LIMITATION OR EXCLUSION OF CONSEQUENTIAL DAMAGES, INCLUDING SPECIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO THIS WARRANTY. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS AND YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE AND PROVINCE TO PROVINCE.

## Français

### Elle vous facilite la vie.

Inutile de brancher plusieurs périphériques à votre ordinateur portable chaque fois que vous revenez à votre bureau. Grâce à une simple connexion USB, la station d'accueil Kensington sd100 vous connecte instantanément à votre écran, clavier et autres périphériques. De plus, vous pouvez placer votre ordinateur portable sur le dessus de la station d'accueil pour un meilleur refroidissement et une meilleure protection.

### Configuration requise

- PC présentant les caractéristiques suivantes :
  - Windows Vista ou Windows XP avec Service Pack 1 ou supérieur
  - 30 KB d'espace disque disponible
  - Lecteur de CD-ROM ou DVD
  - Port USB 2.0

Remarque : la station d'accueil sd100 fonctionne lorsqu'elle est connectée à un port USB 1.1 sur votre ordinateur portable ; néanmoins, les performances des périphériques connectés à la station d'accueil via un port USB 1.1 peuvent être compromises.

### Instructions d'installation
