## Use tips

When using your equipment please obey the following basic security matters need attention in order to reduce fire, electric shock and risk of injury.

- Don't let the product itself get wet in the rain or become damp.
- Please keep device away from direct sunlight and heat objects.
- Protect power cable. When connect the power cable, please don't let it be stepped on or above placed items, avoid to be extrusion. Pay special attention to protection of equipment connector.
- Please use the original power adapter for charging, using other charger will cause damage
- Don't dismantle the equipment or repair yourself.

## Cleaning equipment

Touch the screen gently. To clean the fingerprint or dust on the screen, it is better to use such as camera use soft cloth but not gauze to clear the dust.

# 1.Outlook description

## 2. Power button usage

**Starting up**：Long press the power button for 3 seconds.
**Power off**：Long press the power button for 3 seconds →click power off → click confirms.
**Screen off and on**：Short press power button to turn off or turn on screen
Mandatory shutdown: If the device has no response, long press the power button for 6 seconds to perform mandatory power off.
**Notice:** In case of no necessary conditions, it's better not use mandatory power off. Power off should be performed normally according to the standard steps.
Reset button: Press "reset" button to restart the equipment.

## 3. Touch screen

According to following user guide, and know how to use touch screen.
**Click:** Click an optional icon on screen as your choice.
**Longer press:** chose one icon and press longer, can drag then show the icon on desktop menu.
**Dragging:** Icons can be put into different screen interfaces by dragging the icon between different screen interfaces.
☆ To protect the screen, please don't put any objects above the screen surface.

## 4. Transfer connection

Before using USB device please connect transfer line to computer.

USB data line

### U Disk

Connect U disk with transfer line →insert USB OTG port with OTG

transfer line. When U disk is ready then you can use.
☆Please don't push U disk frequently ,or will damage the U disk.

# 5. TF card Usage

## Support 32GB memory card

Insert the memory into the card slot then the screen will display " SD card is in readying now ", when the words disappear, it means the TF card have been prepared that can use.

## Cancel TF Card

Close all programs or documents in the card .Click

→ setting → TF card and internal memory → Uninstall TF card，press and popup a half of card then take it out.
☆ Please don't insert or push the card for more times or will damage the Card.
☆ Use brand card to avoid incompatible.

# 6. Start to use

## Battery charging

One port of the power adapter insert into socket, another port connect to DC interface of device to charge ,when the battery is in charging will display as: When the battery is fully charged, battery ICONS display as： .

☆Can use a USB cable to connect the PC to charge.
☆Can Use the device when it is in charging, but have to spend more time for charging.

## Battery management

The battery is not fully charged when packaged , advise you to make battery fully charging for 4 hours at least before you use the device.

Rechargeable battery life, generally depend on the times of charging and discharging. However, you can also play through the following Suggestions to extend the life of battery:

- To use the device at least once a week.
- Regularly for battery fully charge.
- Don't let the battery in long time no power.

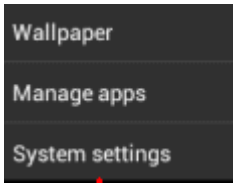
| | **Places** | Connect with internet to check your location and relative places near your location. |
| | **Google Market** | Login to download applications ,games etc. |
|  | **Search** | Search tool, search anything you need online. |
|  | **Setting** | Set your system. |

☆Long press to drag the icon.

☆Long press icon and drop in to remove it from menu.

# 10. Menu

On the desktop, use the menu button to display the menu



Function, at the same time can realize commonly used procedures setting in the desktop .The way of setting are pressing the procedures logo to desktop.

# 11. Application program

## Install applications

A lot of Free and interesting Applications are available on internet, you just need search by" Android applications" key words.

The Android Applications you downloaded are saved in

, you can install it easily:

1. Copy the apk application to SD or USB device →Put the SD card into Tablet or connect USB device with Tablet.

2. Click

.files browser logo.

3. Click

or find the file with apk.

4. Click the APK application → Install.
After install successfully, the new application icon will show in Menu.
5. Click icon to run application or finish to return browser interface.

## Download applications from Internet

User could download any Android application from internet and install

it easily and fast.

1. Click to search application in internet.
2. Input website address, click the download link to download the application.
3. After download finished, long press the application (saved in download history) → Click and open → install.

## Connect to PC and save files

1. Connect Tablet with PC by USB cable. One side is USB OTG port , another side connect PC USB port.

2. After connection, it will display image , choose  run it , then click Turn on USB device then user can exchange files between PC and Tablet device, as below:

## Uninstall application

User can easily to uninstall Android applications as below:
1. Click Menu button→ setting → applications→ manage applications.
2. Choose the application → uninstall.
3. Click Yes to confirm uninstall.

# 12. Sound record

Click icon

will display as below:

Click start to record, click to stop record, click to view the record document and the documents will named according to the time you record. Click the record document to play record, click to set the record you made.

# 13. Clock

☆Click icon

, User can check current Date and time.

## Alarm clock

A few different alarm clock can exist in same Tablet.

When the icon show in top of Screen, it means at least one alarm clock is working.

## Add new alarm clock

1. Click icon

.

3. Set new alarm clock.
☆If you didn't set repeat, after alarm works on time, system will auto-delete the information.
☆Click to start use the new alarm clock.
4. Finish

## Disable alarm clock

When the alarm time on, a window with Clock will pops out.
If User need alarm again after 10mins,click Pause.
Click Cancel to stop alarm.

## Enable Alarm clock

Regarding the alarm clock which already set in repeat, Then usually User need suspense using it not delete it:

1. On interface of Clock，click icon to suspend use this alarm clock.

2. Click to resume.

## Edit alarm clock

1. Click

→click 。
2. Entry the clock User need edit → reset.

## Delete alarm clock

1. Click icon

→ click .
2. Open the alarm clock user need delete.
3. Choose delete it.

4. Click return to desktop.

# 14. Download applications and install

1. Click icon

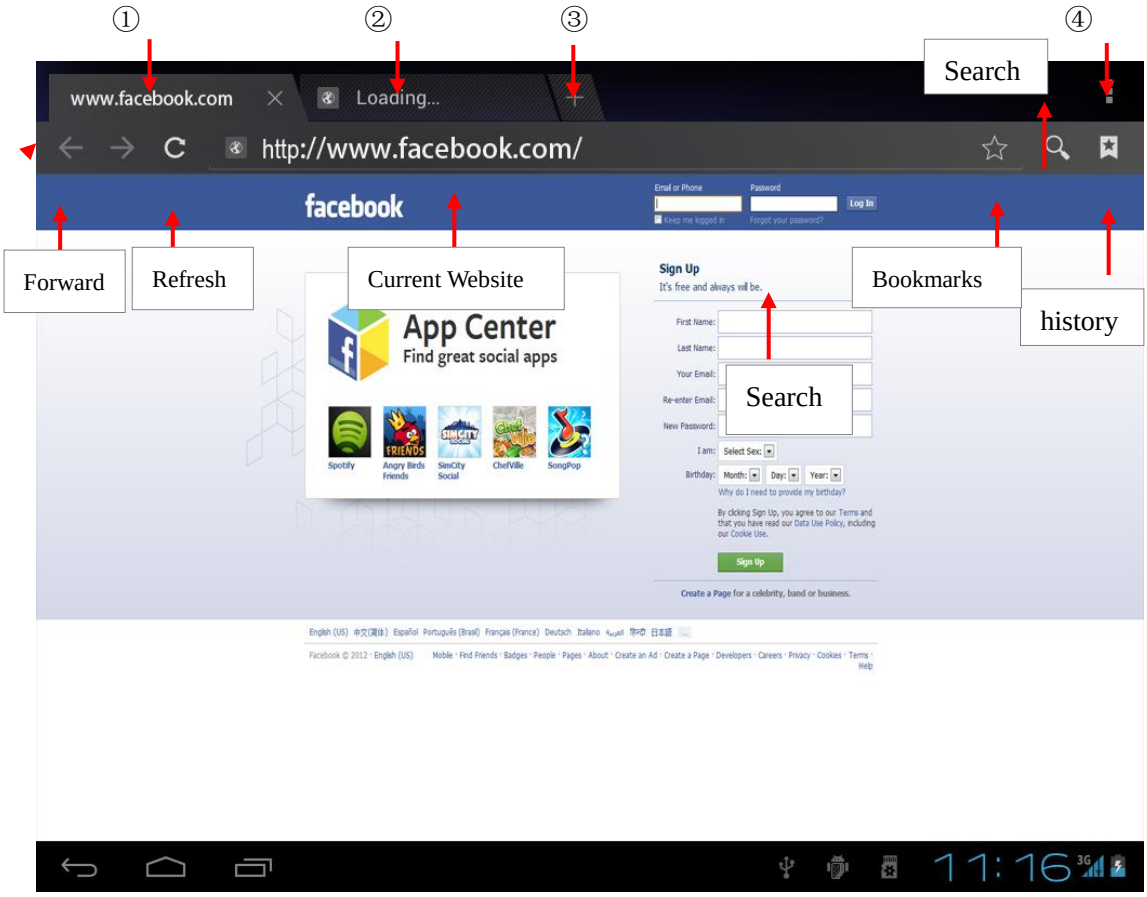
.
2. User can check and install the available applications from PC.

# 15. Browser

User can reach to internet by browser.

Click icon

to open internet：



①：Visited web site；②：Current web site；③：Add web sites；④：Menu

# 16. Calendar

Click

the calendar program icon.

First used calendar, need to add an exchange account. Input account email address and password. Click on next, according to the prompt complete account configuration， after that the calendar can be used.

## New activities

1. In the calendar interface, click new event dates you want to build.
2. Choose activity time - input relevant activity details in every field.
3. Click finish.

☆Color display for gray date mean there are agenda on the day.

# 17. Camera

Click

to open camera then display icon

## Take photos

1. Click to take photos.
2. Pictures will be kept.
3. Click the thumbnail to enter into my album to view pictures.
4. Click back icon to return back to camera.
5. Click to realize camera setting.

## Video recording

1. Click switch to Video.

2. Click to start recording，click to pause recording.
Video will be kept.

3. Click the thumbnail to play the video.
Click back icon to return back to camera.

4. Click to quit camera and back to UI interface.

5. Click to realize vedio recording setting.

| **About tablet PC** | | Check status messages, and power usage, legal information, model, Android version, kernel version and the version number |
| **Touch screen calibration** | | Touch screen calibration |

# Appendix Ⅰ Frequently Asked Questions

**Q: Why won't my device turn on?**

Make sure your tablet has been charged for at least four hours prior to use. When plugging in the cable, make sure you are not accidentally plugging it into the headphone jack. Also, the power button is on the side (for tablets) and not the one on the front of the touchscreen. The button on the front is for navigation.

**Q: Why won't this unit connect to Ethernet?**

Assuming your unit does have the RJ45 port, you want to make sure that Wireless is turned off. If Wi-Fi is on, it will negate the Ethernet connection.

**Q: Why does my unit have scratches/bubbles on the screen?**

These units ship with a very fine plastic film to protect the item in transit. This film is intended to be removed prior to use. Sometimes this takes a strong fingernail or some similar item to peel it off.

**Q: Should I perform a Firmware Update?**

Not necessarily. This is actually intended if obscure issues with the tablet occur. Unless you are having issues with the tablet which a Factory Data Reset has not resolved, it is not advised that you perform this step.

However, if you are sure you wish to attempt this procedure, please visit the following link for available firmware downloads and the instructions on how to perform the update:

**http://mymidpad.com/firmware/**

**Q: Why don't I see a firmware version for my model?**

We are always working on providing the latest and best firmware for all of our devices. If you don't see your specific model listed, please check back soon.

**Q: I don't remember my password, what can I do?**

If you have previously added a Google account, you may be prompted for a password reminder if you fail the security 4 or 5 times. Otherwise, please refer to **Should I perform a Firmware Update?**

**Q: How long should my battery last after charging?**

As for battery life, this depends on which model tablet you use. Our Android 2.2 tablets usually average around 1-4 hours. The Android 4.0 tablets approximately twice that. However, that is totally relative to factors such as how bright the screen is during use, how often it is using the wireless connection, what background processes are running, if you are using a Live Wallpaper, and more. It is very difficult to estimate the duration of a full charge in consideration of these issues. If this seems like abnormally poor performance, just let us know.

**Q: Why does my screen not respond properly when I use the touchscreen?**

This may be a couple of different things. If this only occurs when charging from a power supply, this may be due to noise from the power source not being adequately filtered out. You may wish to give the unit a full charge and then disconnect from power for use, or, if possible, charge with a USB cable instead. Otherwise, your screen calibration may be off. To correct this, check for Settings->Touchpad Calibration to see if you can recalibrate this to resolve the issue.

**Q: Why is my tablet stuck at boot up, and the Android screen will not go away?**

Please see above: **Should I perform a Firmware Update?**

# Appendix Ⅱ 3G Support List

| NO. | 3G Model | Cellphone Model | NO. | 3G Model | Cellphone Model |
