

Productivity that's perfect for:

Hospitality

Excellent service and customer satisfaction are the keys to loyalty and repeat business. The DTR410 keeps your staff connected, from the front desk and concierge to event planners and maintenance personnel. That means a more productive staff and fast response to guest needs, special events and emergencies.

Retail
Responsive service is essential to sales and customer satisfaction. The DTR410 makes responsiveness easier to provide, whether it's an answer to a customer's question, a price check, a clean up or an emergency. With clear, constant communication ensured, customer satisfaction can be taken to the next level.

Construction

To keep any construction project on track, you need timely coordination from management to foremen, subcontractors to individual tradespeople. The DTR410 makes it easy, helping keep projects on schedule, avoid errors, meet deadlines and keep costs on budget.

Education

Maintaining order and ensuring student safety are priorities for any school. The DTR410 keeps everyone in touch — from teachers and administrators to crossing guards and maintenance personnel. That enables a quick response in any situation, preventing small problems from escalating to bigger ones.

Property Management

With the DTR410, building managers, maintenance technicians, groundskeepers, and security personnel can respond fast to tenant needs or emergencies, minimizing costs and enhancing tenant satisfaction.

Manufacturing

Success in industry depends on two things: efficiency and responsiveness. The DTR410 provides clear communication, and enables your fast response to production problems and injuries. Its rugged construction stands up to industrial environments, and its long battery life meets the demands of overtime and multi-shift operations.

Everything you need.

Review the extensive features of the DTR410.

Feature	DTR410
900 MHz ISM license-free band	•
Digital one-to-many group call	•
Public groups	Up to 5
Frequency Hopping Spread Spectrum (FHSS)	•
5.2" H x 2.3" W x 1.4" D	•
Meets military 810 C, D, E and F specifications for shock, vibration, water, dust and temperature extremes	•
2-pin radio accessory jack with captive connector cover	•
Full-graphic backlit display with contrast adjustment and backlight timer	•
Battery gauge	•
Daily alarm	•
Caller ID	•
Recent call list — last 20 transmissions	•
Up to 5 Group contact list	•
Unit-to-unit configuration cloning (via optional Cloning Cable)	•
Battery life	Standard—up to 14.5 hours of operation per full charge
Charge time	3 hours

Advanced Digital Performance.

Motorola DTR410™ Digital On-Site Two-Way Radios for Business Critical Communication.

The DTR410™ expands the capabilities of your team, enabling them to get the job done right, fast and safely.

Do you speak digital?

The better a team communicates, the more efficiently it operates. The DTR410 is the power tool that enables that communication. Unlike alternative technologies, there are no monthly fees. No service towers. No per-minute charges.

These durable on-site two-way radios help businesses keep operations on schedule, maximize job shift productivity, enhance security and increase overall customer satisfaction. It all adds up to a superb combination of features for your convenience, management and productivity — all at an extraordinary value.

Excellence in Design; Exceptional Durability

Rugged and reliable, the DTR410 digital on-site radio undergoes rigorous testing in the design process using U. S. Military 810 C, D, E, and F Standards — so you can rest assured it will hold up under demanding conditions. These tests are designed to simulate the very harshest environments, including:

Blowing Rain

Steady rainfall and wind for 30 minutes on every surface

Salt Fog

48 hours of exposure

Blowing Dust

Six hours of blowing dust on all surfaces

Shock

18 shocks with a minimum G force of 40 G each

Vibration

Up to nine hours of exposure to vibration that simulates the rigors that a radio could undergo while being carried or transported

Temperature Storage

Multiple hours of exposure to storage temperatures as low as -67° F and as high as 160° F

The Digital Difference.

Enhanced coverage, battery life and audio quality are just a few advantages of our new digital on-site two-way radios. No license is required to operate our 900 MHz units. And for enhanced security, we added Frequency Hopping Spread Spectrum (FHSS) with 50 non-overlapping groups. Unlike analog radios, multiple group communications can occur simultaneously on the same channel.

In addition to these overall benefits, you'll be able to take advantage of many leading-edge operational features that were never available previously. And you'll soon wonder how you managed without them.

Because the digital technology of the DTR410 enables each unit to have its own unique 11-dig ID identification, you get a new level of radio communication versatility with these calling features:

Digital One-to-Many Group Calling. Public group call — all other DTR410 radios on the same group ID and channel hear communications, similar to analog radio operation.

Transmit ID. Receiving radios will display the radio ID of the transmitting unit and, if listed in the receiving radio's contact list, the transmitting unit's radio name.

Scroll list. You can view a recent-calls list, showing the source and target of the last 20 transmissions with time and date information.

Digital audio quality. Stays loud and clear everywhere you have coverage.

Frequency Hopping Spread Spectrum (FHSS). Provides enhanced security with 50 non-overlapping groups.

Enhanced coverage. Coverage extended by 20%* — up to 300,000 sq. ft. or 25 floors.

Enhanced battery life. Up to 45% longer operation on a single charge.*
