## GOAL DISTINCTION

**POSITIVE LOCK BREAKAWAY GOALS** - Positive Lock goals are spring loaded to withstand a specific amount of force applied to the rim before they automatically release and pivot downward. The amount of force required to release the goal is adjustable. Once the force is removed, the rim will return to play position.

**FLEX BREAKAWAY GOALS** - Flex breakaway goals are spring loaded but do not include the positive lock mechanism, therefore there is no force threshold required to move the rim. Increasing the force load will cause the rim to travel farther away from play position. Once the force is released, the rim will automatically return to play position.

**FIXED GOALS** - Fixed goals are made of a hard-wearing steel that will not flex or breakaway, but stay strong through repetitive use.

This control system is a major improvement over a conventional key switch used for each of your backstop winches, divider curtains, scoreboards, etc. With the Spalding® gymnasium controller, you can control up to 42 devices easily from one location with just the touch of a screen.

- Controls your gymnasium with easy-to-operate computer screens – 2 styles available
- One motor will run at a time, allowing for optimal observation of the equipment while in use
- Each relay panel can control up to 7 different motors with net working capabilities to run up to 42 devices from one location
- All low voltage displays are username and password protected to maintain equipment security
- Controller can operate: Ceiling-Suspended Backstops, Divider Curtains, Retractable Batting Cages, Height Adjusters, and Activate scoreboards, lights and sound systems
- Note: All wiring should be completed by a licensed electrician. All wiring, conduit, components and installation techniques must meet all applicable local, state and national codes
- Programmable to store various operations such as basketball practice, volleyball or basketball games, gym mode, etc. Can store up to 10 scenarios
- 10" x 10" electrical enclosure for controller is not included

401-953 ENHANCED TOUCH SCREEN

401-952 SIMPLE TOUCHSCREEN

401-950 OPERATES UP TO 7 MOTORS OR 2 AUXILIARY DEVICES

Kiraly approached his longstanding partner, Spalding, the maker of the original “18 Panel” beach volleyball and current industry leader with the King of the Beach/US Open of Beach Volleyball Series, to create a net and net system of a quality to match Spalding’s volleyball products. Karch and Spalding agreed to develop two new volleyball offerings: A stand-alone “High End” net that would deliver the same performance Karch was accustomed to on the pro tour; and a “Tournament Quality” portable net system that wouldn’t compromise the integrity of play, that could perform as well as permanent post systems, that would be simple to set up and take down, and that could be used on both Sand or Grass surfaces.
